MADAME YALE'S HEAD ASSISTANT FROM THE YALE TEMPLE OF BEAUTY, CHICAGO.

Will be in attendance all this week at the Special Yale Department at S. Kann, Sons & Co. Ladies may consult with her free of charge,

A MOTHER'S MERCY

Always Anxious to Save the Little Ones From Suffering.

LACK OF PROPER CARE IN CHILDHOOD LAYS THE FOUNDATION FOR HABITUAL CONSTI-PATION, CAUSING LIFE-LONG SUFFERING.

Nothing so sweet and touching as a mother's care for her little ones.

What a tender, watchful eye her anxiety keeps on the young hopefuls. In the young nearly all allments are directly

traceable to stomach and bowel complaints. Physic and purges are the most common and most dangerous of all medicines. Nearly all contain oplates or mercurial and other mineral polsons, which permanently affect the tender bones

and tissues of the child.

The only proper laxative for a child is a gentle, positive vegetable liver stimulant, like Cascarets Candy Cathartic. For the babe-in-arms the mother eats a Cascaret. It makes her milk mildly purgative, and benefits the baby. Older children eat a piece of a Cascaret like candy. They taste good, make the liver lively, prevent sour stomach, purify the blood and regulate the bowels perfectly. Go buy and try Cascarets today. It's what they do, not what we say they do, that proves their merit. All druggists, 10c., 25c. or 50c., or mailed for price. Send for booklet and free sample. Address Sterling Remedy Co., Chicago; Montreal,

Can., or New York. This is the CASCARET tablet. Every tablet of the only genuine Cascarets bears the magic letters "C C C." Look at the tablet before you buy, and beware of frauds, imitations and substitutes.

DON'T USE INFERIOR GLASSES!

EYES

Headaches, dizziness, nervousness and insomnia are caused by cheap and improperly fitted glasses. We will give you a thorough and selectific examination free of charge and fit your eyes at our well-known reasonable prices.

JUNIOR REPUBLIC

Visit Paid the Institution Near Annapolis Junction.

SYSTEM OF GOVERNMENT EXPLAINED

Session of Court Held for Trial of Offenders.

large number of the delegates to the conference of charities and correction, journeyed out to the National Junior Republic near Annapolis Junction, Md., yesterday afternoon, leaving the Baltimore and Ohio depot on the 12:15 o'clock p.m. train. Arriving at the junction the party was met by a number of teams and carried over to the farm, distant about a mile and a half from the station. The object of the visit was to show to the members of the association just how the republic is conducted

On their arrival at the farm the visitors were introduced to the superintendent, Mr. W. G. Rogers, a graduate of Cornell University, who was formerly with Mr.George, the originator of the principle of junior republics. Mr. Rogers briefly explained the working of the institution, pointed out the different places of interest and stated that the population of the farm numbered thirty-six, thirty-three of whom were boys and three girls. It was also explained that the Ladies' Auxiliary of the National Ju-nior Republic has about completed arrangements for the erection of a building a short distance to the front of the present dwelling, the plans for which include a library, court room, office rooms for the executive officers, and school room on the ground floor, the upper floor being used as a dormitory. As soon as this building is completed, it is said, accommodations will be afforded for a large increase in the population of the republic.

Mr. E. L. Hunt, a member of the executive committee of the organization, traced the history of the institution from its beginning. With the power to make their own laws, see to their proper execution and punish all infractions of the same, the boys steadily advanced from a stage of "junior anarchy" to that of a genuine republic. They early showed a spirit of self pride and the disgrace of being tried by judges of their own selection and fined according to laws set down by themselves. was more than they desired to be made acquainted with a second time. The present republic had for its inception a plan set on foot to secure funds for the George Junior Republic, and when the question arose as to why an institution of that kind could not be started in this vicinity, public-spirited citizens took hold of the question and in a short time the enterprise sprouted up on the Newbold farm, the present seat of government of the republic, and citi-zens of Baltimore and Washington contributed to the funds for the purpose of the establishment and maintenance of the project, the farm being donated by Major Charles Newbold of the United States

velvety complexion.

Mode of Conducting Elections. A citizen of the republic explained the mode of election of officers of the government and the manner of holding meetings. The handling of the lawbreakers, he stated, was carried out in the most businesslike manner, and the punishments inflicted upon the offenders, such as a bread and water diet and working during the daytime without pay, was not a matter of play, but the real thing. It was inferred from his remarks that the new arrivals at the republic cause the most trouble, they hav-ing a great desire to get away from the premises, but after a short sojourn they become reconciled and prove to be good and law-abiding citizens of the common-wealth. However, a late arrival, having been sent to the jail for a misdemeanor, secured his liberty by prying off the bars from the front of his cell. He has not been seen since and no reward has been offered

for his apprehension. When the impromptu speechmaking was concluded the visitors made a tour of inspection of the premises, starting with the schoolroom. This institution, it was found, is not a plaything, but an up-to-date school, complete in every detail pertaining to the instruction of the young and comparing favorably with any of the county schools in the vicinity. The older citizens attend the sessions in the morning and after the noon hour take their places at their different callings. The smaller children attend the afternoon session. The laws of the republic are strict on education. The citizens have no desire to be confront-ed with a disfranchisement law, and therefore each and every one has to spend a portion of his or her time in study. The ail was next looked over. A "solitary confinement" prisoner will no doubt think himself a much-abused individual from the amount of sympathy doled out to him by the kind-hearted visitors. The upper portion of this structure is used as a dor-

What Was Observed.

From this point the guests scattered in groups and saw everything that was worthy of their attention. It is hardly likely that they expected to see anything like the example set before them of what might be done if the proper means are applied. The farm contains 144 acres, and the boys have at this early stage of the season about ninety acres under cultivation. The conditions existing here are what might be expected to be seen on a visit to a model farm operated by the state authorities. The whole place has the appearance of farms in the best-groomed localities, and contrasted strongly with the canties, and contrasted strongly with the places passed on the brief trip from the city. The truck gardens contain all the different kinds of early vegetables, and with favorable weather conditions to the crops the citizens will be able to export large quantities of truck to the city markets and still have sufficient to carry them over the winter. Another thing that could not but attract their attention was the business-like look of the entire place. Here were some of the boys engaged in assisting the carpenter of the place in putting up a structure for the storing of the farm imwill be used as a carpenter shop; there a youngster industriously engaged in chopping up a large tree, while several could be seen in the distance working in the fields. Another was fixing wire net about some flower beds to protect them from the evergrowing flock of fowls. The boys have an incubator, and most of the chicks now out were hatched by this means. The machine has been again "loaded." It holds 200 eggs. The visitors were struck with the dis cipline displayed by the citizens of the juvenile republic, everything moving with the precision of a piece of machinery. A session of the court was held on the front porch of the dwelling to illustrate to the guests the working of the judiciary of the institution. The first case up was that of a little fellow, apparently between the ages of ten and twelve years, who was charged with the theft of an article from the belongings of another boy. He pleaded not guilty and demanded a jury trial. The jury was secured in record-breaking time, and after hearing the evidence in the case retired to deliberate. The Patterson case will stand a bad second compared to the time consumed in this jury arriving at a decision. The foreman announced that the prisoner was found guilty. Besides a fine, the offender was sentenced to the "gang" for a term. Charge of Vagrancy. "To what base uses do we come!" I remember well the battle off Hampton Roads. I was a schoolboy at Norfolk and our school was excused to go down to Town Point to see the flotilla, with the Merrimac in the lead, proceed down the river On her deck, waving his hand, was one of our own playmates, a young midshipman. We heard the roar of the guns in the fight and next day the Merrimac returned, not driven back, but with her ram disabled by

The next case was that of vagrancy. The term "vagrant" is used to designate citizens who have not paid their board a certain time in advance, who has not a set amount of money at his command and is found idling away his time. The offender in this case was fined and admonished to do better in the future. The court was

Catarrh Creeps Downward to the Lungs.

Taken at Night Before Retir= ing and in the Morning on Arising,

STUART'S CATARRH TABLETS

relieves all the disagreeable symptoms and in a short time drives the disease from the system.

S MPORTANT TO KNOW WHAT YOU ARE TAKING WHEN USING CATARRH REMEDIES.

Catarrh is the short route to consumption, and the importance of early and judicious treatment of catarrh, whether located in the head, throat or bronchial tubes, cannot be too strongly emphasized.

The list of catarrh cures is as long as the moral law and the forms in which they are administered, numerous and confusing, from sprays, inhalers, washes, ointments, and salves to powders,

The tablet form is undoubtedly the most convenient and most effective, but with nearly all advertised catarrh remedies it is almost entirely a matter of guesswork as to what you are taking into your system, as the proprietors, while making all sorts of claims as to what their medicines will do, always keep it a close secret as to what they are.

The success and popularity of the new catarrh cure, Stuart's Catarrh Tablets, is largely because it not only cures catarrh but because catarrh sufferers who used these tablets know what they are taking into their systems. Stuart's Gatarrh Tablets being composed of Eucolyptol, Hydrastin, Guaicol and similar valuable and antiseptic ingredients, and are pleasant to the taste and being dissolved in the mouth they take immediate effect upon the mucous lining of the throat, nasal passages and whole respiratory tract.

The cures that Stuart's Gatarrh Tablets have accomplished in old chronic cases of catarrh are little short of remarkable, and the advantage of knowing what you are putting into your stomach is of paramount importance when it is remembered that the cocaine or morphine habit has been frequently contracted as the result of using secret catarrh remedies.
